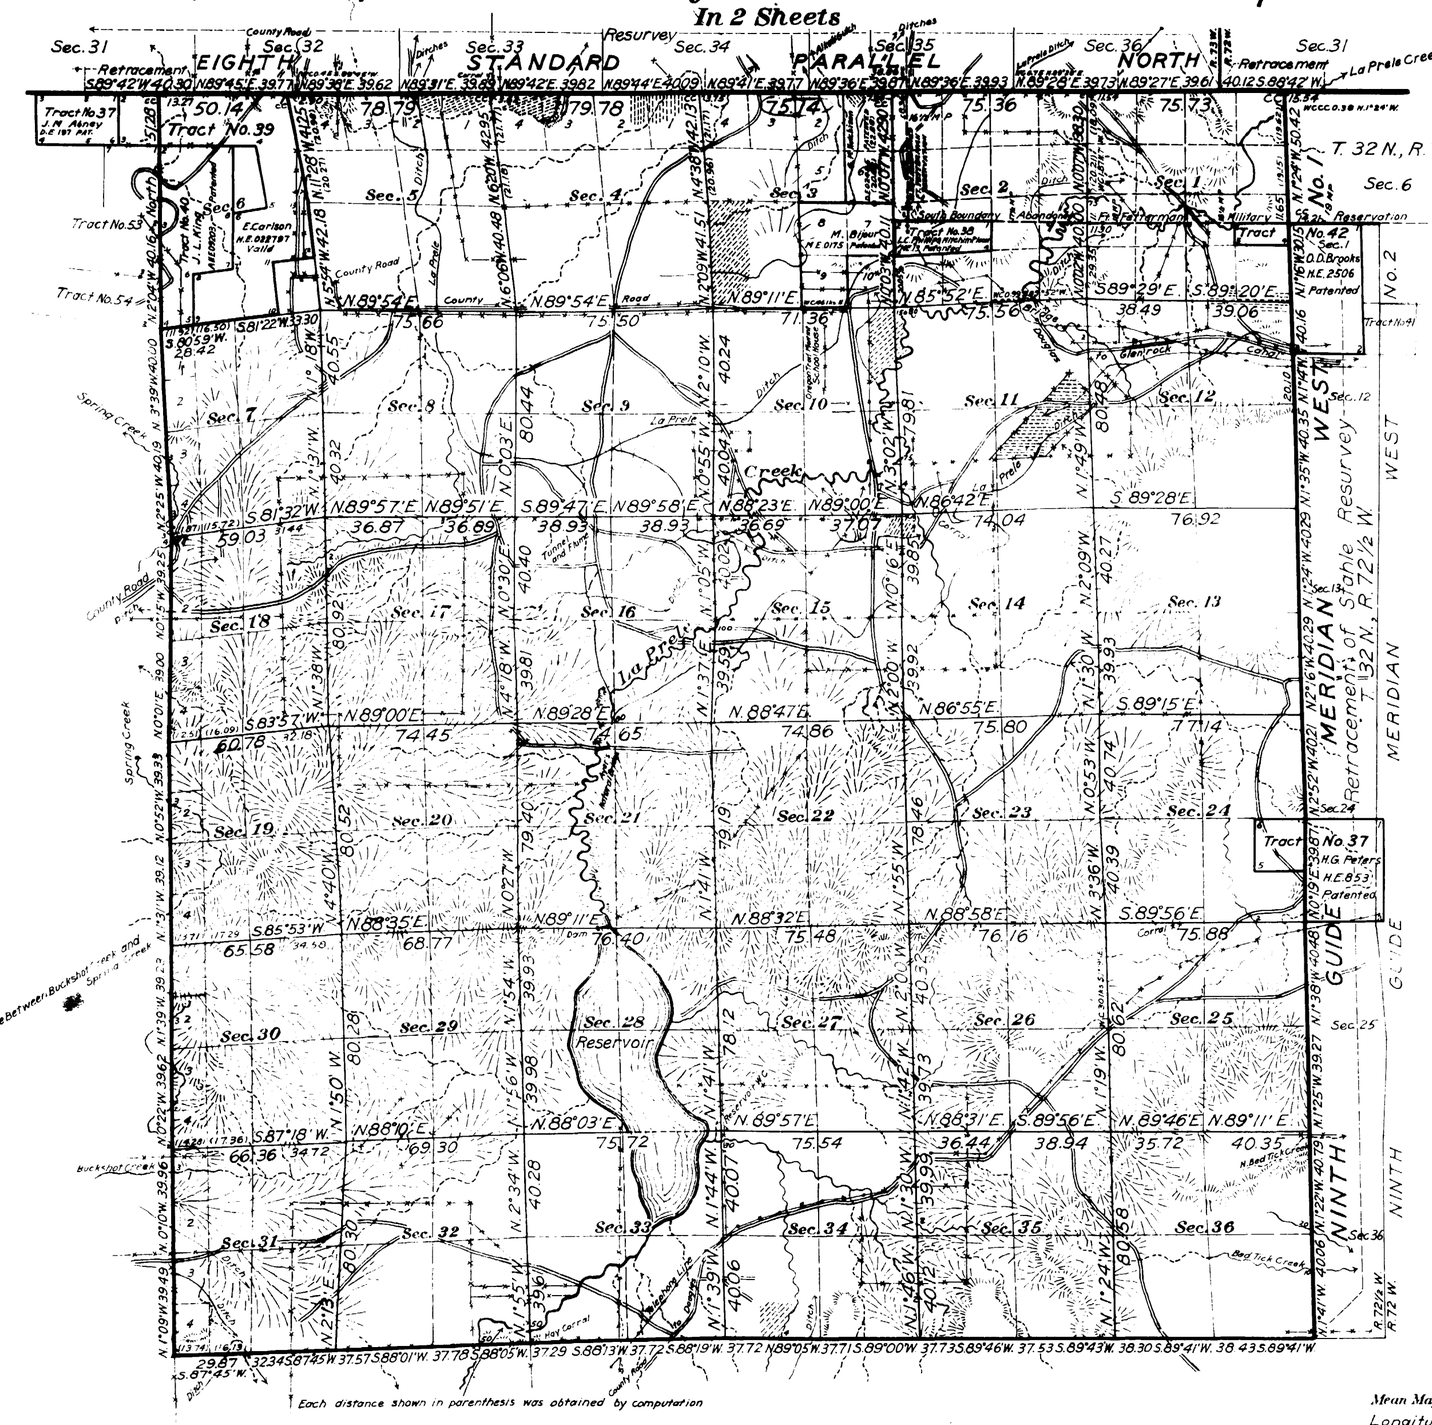
Survey accepted January 18, 1924

Resurvey Township No. 32 North, Range No. 73 West of the Sixth Principal Meridian, Wyoming

In 2 Sheets

Sheet No. 1



This plat of Resurvey T. 32 N., R. 73 W., in 2 sheets, delineates a dependent resurvey of the lines of the original survey of Secs. 4, 5 and 7 to 36 inclusive, as shown on plat approved May 29, 1884, and a dependent resurvey of Secs. 1 and 2 as shown in field notes of survey by W.O. Owen, approved May 26, 1888, in their true original position according to the best available evidence of the position of the original corners. All differences between the measurements shown in the original record and those derived in the dependent resurvey have been distributed proportionally between accepted corners, according to surveying rules.

Section 3 is defined by a restoration of the original survey of the N., S. and W. boundaries and a restoration of the Owen survey of the E. boundary.

Section 6 is defined by a restoration of the original survey of the N., E., S. and south half of W. boundaries. The north half of the W. boundary of Sec. 6 is an independent resurvey by W.H. Clark, Group 5.

Reference will be made to the original plats for the showing of areas and more detailed description of the various smaller subdivisions with the exception of Section 2 where public land has been created between the Owen survey of the line between Secs. 2 and 3 and the Owen independent W. boundary of the military reservation, and Section 6 where the remaining public land has been considerably reduced in area from the original record. Remaining public land in Secs. 2 and 6 will be subject to sale on the basis of this plat.

All tract segregations shown hereon and Lots 1, 6 and 7, Section 3 of the original survey, represent the position and form of said tracts under the original description as referred to the original survey, located as such on the ground, according to the best available evidence of their true position.
