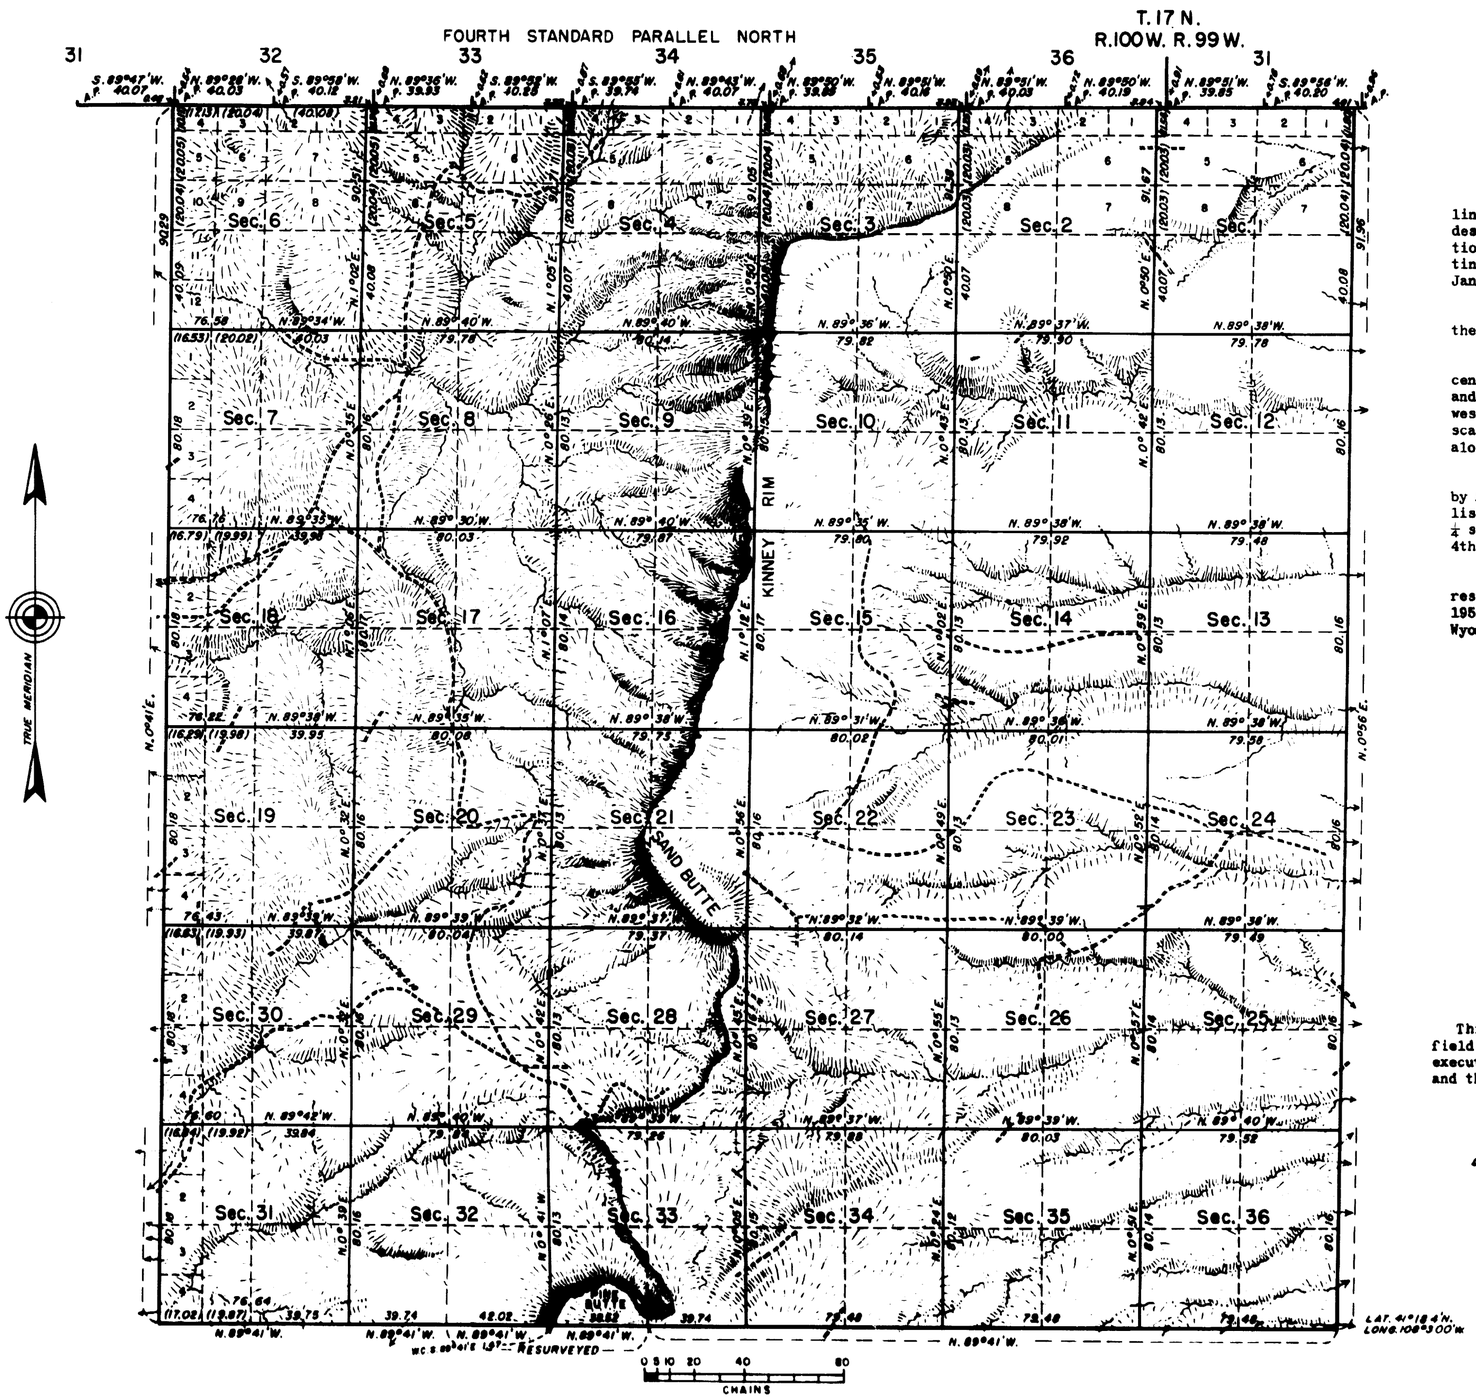
Ac. 6703

ORIGINAL

TOWNSHIP 16 NORTH, RANGE 100 WEST OF THE SIXTH PRINCIPAL MERIDIAN, WYOMING.

DEPENDENT RESURVEY

RECEIVED MAR 15 1957



Area resurveyed: 23401.67 acres

This plat represents a resurvey of the subdivisional lines of T. 16 N., R. 100 W. of the 6th P. M., Wyoming, designed to restore the corners in their original locations according to the best available evidence. The lottings and areas are as shown on the plat approved January 9, 1883.

The history of the earlier surveys is set forth in the field note record.

The township is divided by Kinney Rim through the center. The land slopes gradually from it to the east and drops abruptly 400 feet over sandstone ledges to the west. There is a good stand of pine on Pine Butte and scattered pine and cedar in the rest of the township along the drains.

The North, South, and East boundaries were resurveyed by Adams and Saxon in 1910. In 1914, A.D. Davis established monumented angle points at superseded section and ¼ section corners along the North boundary, which is the 4th Standard Parallel North through Range 100 West.

As shown hereon, the subdivisional lines were resurveyed by Russell C. MacDonald April 22 to July 23, 1953, under Supplemental Special Instructions for Group 12, Wyoming, dated March 20, 1953.

UNITED STATES DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
Washington, D. C. December 26, 1956

This plat is strictly conformable to the approved field notes, and the survey, having been correctly executed in accordance with the requirements of law and the regulations of this Bureau, is hereby accepted.
