This plat of the resurvey of Township forty-four North, Range Eighty-three West, Sixth Principal Meridian, is the result of the retracement and reestablishment of the lines of the exterior boundaries and subdivisional lines of the original survey as shown upon the plat accepted on the 8th day of April, 1884. The method of procedure followed in the retracement of the original lines and the establishment of the corners not found or identified is described in the manuscript report of the surveyor general dated December 31, 1930. The lengths of the lines as surveyed differ in some instances from those given in the notes of the original survey, and these differences have been distributed proportionately between the known corners in accordance with surveying practice and the rules governing the original survey. Reference is made to the original plat for the showing of the area and more detailed descriptions of the various land and sub-divisions except in the case of sections 5 and 6, where the differences in area are so great as to warrant a recalculation of the public lands therein.

All tract segregations shown on the west boundary of this township represent the position and form of said tract as under the original survey as platted and referred to the original survey corners as shown on the record according to the best and latest evidence of their true

[illegible] Surveyor General's Commissioner's letter "I" dated February 4, 1931

Area independently resurveyed	15,640.77
Area independently resurveyed exclusive of tracts	4,660.01
Area of tracts (total)	2,371.85
Total Area	22,672.64

Latitude 43°47'.3
Longitude 106°45'W

Office of U. S. Supervisor of Surveys
Denver, Colorado, July 11, 1932
