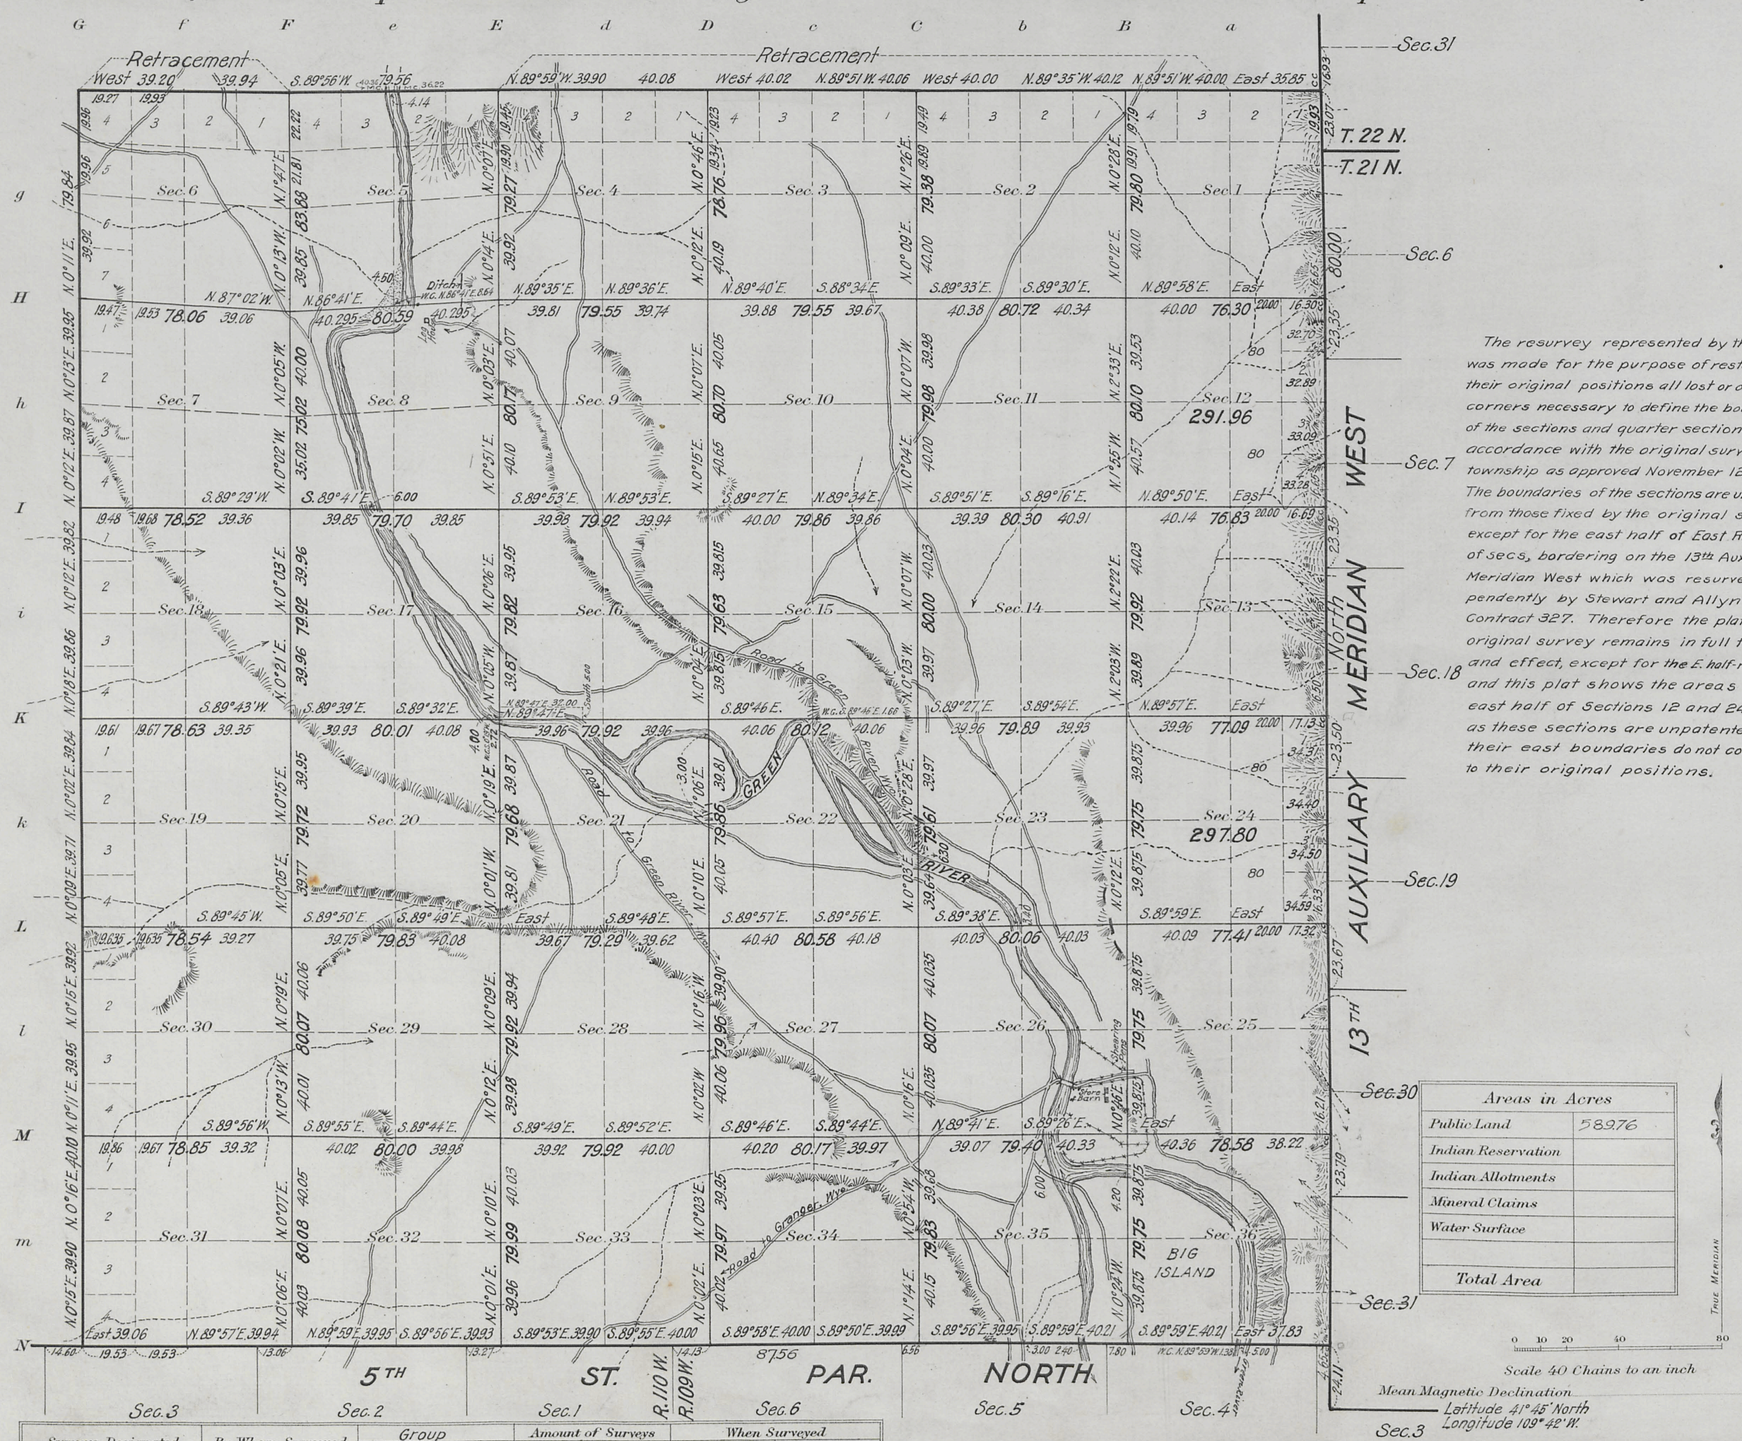
Resurvey Township No 21 North, Range No 109 West of the Sixth Principal Meridian, Wyoming



The resurvey represented by this plat was made for the purpose of restoring to their original positions all lost or obliterated corners necessary to define the boundaries of the sections and quarter sections in accordance with the original survey of the township as approved November 12, 1875. The boundaries of the sections are unchanged from those fixed by the original survey, except for the east half of East Range of secs, bordering on the 13th Auxiliary Meridian West which was resurved independently by Stewart and Allyn under Contract 327. Therefore the plat of the original survey remains in full force and effect, except for the E. half-range and this plat shows the areas of the east half of Sections 12 and 24 only as these sections are unpatented and their east boundaries do not conform to their original positions.
