

AIR IT OUT---F&FU--- FEB 2 2006 @ BOULDER CO

Need a mechanism and follow-thru on trainee lists and ability/commitment to get the folks out. Update the Regional Rx list and possibly get a list going for WFU, especially FUM2 and FEMO. Might be able to utilize ROSS to store and generate these lists?

Need to make sure FUTA, PFTC info gets out to the field...attach links to WYO BLM F & FU web site (B. Means). Explain funding rules and options. Maybe create a new web site (similar to spot weather requests) that Burn Bosses will list their burns a week or two before their burns.

Cross billing – working on simpler and shorter forms and processes. BLM and USFS working on this. DOI overhead assessments need to be waived, also State of Colorado agreements. Bill Wallis will continue to work on DOI issues.

Vice Bernie Post position – the F & FU group supports re-filling this position.

Patricia Disert
8635 Kacey Lane SW
Albuquerque, NM 87105

Wallis, Kerr, et al will take one more stab at RMCG to approve the “cross pollination” of Type 2 C&GS positions.

Fire behavior computer tools workshop, with help from N. Rockies personnel.

Get notes from Albuquerque Fire Use meeting.

Topic suggestions for next year – session(s) on mechanical treatments, continue to bring in out of region folks, reviews of high complexity WFU and Rx fires. Try to put Burn Boss topics together in one or one and a half days. Central location for the meeting is preferred. Suggest Cheyenne for next years location, Ft. Collins second choice. January 30 – Feb. 1, 2007. Session on documentation needs and suggestions. Canadian fuel model presentation. Aviation practices, uses, ignition techniques, etc. FUTA/PFTC show and tell session.

Lathan Johnson needs help with cadre for S-490 and a few other classes...give him a call if you can help.
