

CHAPTER 5—CONSULTATION AND COORDINATION

The Bureau of Land Management (BLM) completed the Green River Resource Management Plan (RMP) in 1997. Management decisions in the Green River RMP on leasing fluid minerals and on locatable minerals were deferred from a portion of the Green River Resource Area referred to as the “core” area. These deferrals were necessary because information on potential mineral leasing or locations for mining claims was not yet sufficiently developed for making sound management decisions. The core area encompasses approximately 90,000 acres. The area to be addressed and analyzed for the Jack Morrow Hills Coordinated Activity Plan (JMH CAP) includes about 622,000 acres surrounding and including the core area. This represents the cumulative impact analysis area for the activity plan, because management of the core area could affect lands outside the core area and vice versa.

The deferred mineral decisions and management of other resources in and around the core area were addressed in an original draft Environmental Impact Statement (EIS) for the JMH CAP. On January 22, 1998, BLM mailed a scoping statement to the media, governmental agencies, environmental organizations, industry representatives, individuals, landowners, and grazing permittees. The scoping statement explained the general nature of the JMH CAP planning effort and requested initial comments concerning the level of analysis, resource information, and concerns. A notice of intent (NOI) to conduct public scoping and prepare an EIS was published in the *Federal Register* on February 5, 1998. More than 190 comment letters were received during the scoping process.

Meetings, including scoping, were held with the public on February 10, February 19, and March 19, 1998, to provide information about the JMH CAP planning effort and to solicit public input. Two field tours and one additional open house were held on September 14 and October 27, 1998 (see Table 5-1 for a list of all public events). All comments received were considered in further defining the issues in the planning area and in developing and analyzing the alternatives for the original draft EIS. The original draft EIS was published in June 2000. A public review of the original draft EIS resulted in additional resource information and public comments that warranted reformulation and analysis of land management alternatives. Completion of the project was thus delayed to evaluate the comments and new information.

An NOI was published in the *Federal Register* on December 6, 2001, to formally announce that the BLM Rock Springs Field Office (RSFO) was preparing a supplemental draft EIS for the JMH CAP. The notice invited the participation of the affected and interested agencies, organizations, and members of the general public in determining the scope and significant issues to be addressed in the planning alternatives and analyzed in the EIS. Additional public involvement was solicited to help identify issues to be addressed in developing a full range of land management alternatives (see Table 5-2 for a list of all public events). This chapter describes that process as well as other key consultation and coordination undertaken for the preparation of a comprehensive, supplemental draft EIS and final EIS for the JMH CAP.

Table 5-1. JMH CAP Draft EIS (2000) Public Events

September 10–11, 2003	Rock Springs, Wyoming	Meeting w/Cooperators
February 19, 2004	Rock Springs, Wyoming	Meeting w/Cooperators

5.1 CONSULTATION AND COORDINATION

Coordination with other agencies and consistency with other plans for the initial (original) draft EIS were accomplished through frequent communications, meetings, and cooperative efforts between the BLM interdisciplinary team and involved federal, state, and local agencies and organizations. With the decision to prepare a supplemental draft EIS, BLM was provided the opportunity for participation of cooperating agencies. Coordination and consistency for the supplemental draft EIS and final EIS were therefore primarily accomplished through the assistance of cooperating agencies formally involved in the project (see Section 5.1.1 for a list of cooperating agencies and a description of their involvement).

The U.S. Fish and Wildlife Service (USFWS) was contacted in December 1998 for Endangered Species Act Section 7 consultation and threatened and endangered species lists. An updated species list was received in October 1999. As a result of this supplemental draft EIS effort, another updated species list was received in January 2002. Coordination with USFWS has also occurred throughout the process by phone.

Coordination with the Environmental Protection Agency (EPA) by phone and through various meetings has occurred throughout the JMH CAP effort since the original draft EIS. Topics discussed include comments on the original draft EIS, the adaptive management strategy, and general project updates.

5.1.1 Coordination and Consistency

Coordination with other agencies and consistency with other agency and local and state government plans were accomplished through frequent communications and cooperative efforts between BLM and involved federal, state, and local agencies. The Wyoming Governor's Clearinghouse receives 20 copies of this final EIS for review to ensure consistency with ongoing state plans. The interdisciplinary team reviews county land use plans to ensure consistency. Meetings are held with the respective county planners and commissioners to promote greater understanding of goals, objectives, and resources of both the counties

and BLM. Table 5-3 summarizes all coordination actions that BLM undertakes with federal, state, and local agencies.

Table 5-3. Key Coordination Actions

Agency	Coordination/Responsibility
FEDERAL AGENCIES	
U.S. Department of the Interior	
Bureau of Reclamation (BOR)	Coordinates mineral leasing and other activities that affect lands administered by the BOR. Reviews the JMH CAP for consistency with BOR planning.
Fish and Wildlife Service (USFWS)	Reviews actions affecting threatened or endangered species of fish, wildlife, or plants. Section 7 consultation, coordination, and review.
U.S. Geological Survey (USGS)	Reviews JMH CAP for consistency with USGS planning.
Minerals Management Service (MMS)	Reviews JMH CAP for consistency with MMS planning.
U.S. Department of Agriculture	
Forest Service	Coordinates mineral leasing and other activities that affect lands administered by Forest Service. Reviews the JMH CAP for consistency with Forest Service planning. Proposed actions would also be discussed with the Wyoming State Forestry Division and other agencies involved in wildland fire management. Coordinates and cooperates with EPA and DEQ on monitoring and collection of air quality data.
Animal and Plant Health Inspection Service–Wildlife Services	Coordinate annual management plan for animal damage control activities on public lands.
U.S. Environmental Protection Agency	Coordinates with Forest Service and DEQ on monitoring and collecting air quality data. Reviews air quality monitoring data. Files <i>Federal Register</i> notices.
STATE AGENCIES	
State of Wyoming	Participates in the environmental analysis and documentation process by providing information concerning environmental issues for which the State of Wyoming has jurisdiction by law or special expertise. Provides information from state records on matters including, but not limited to, JMH CAP project impacts on air quality and Class 1 air sheds, fish and wildlife, domestic livestock grazing, social and economic impacts, minerals, and State of Wyoming permitting requirements. Cooperates in the development of watershed improvement and restoration plans. This includes a focus on restoration activities where the state has identified water bodies impaired by pollutants for which BLM through best management practices can provide positive benefits and improvements.
Wyoming DEQ	Coordinates and cooperates on water quality, development of monitoring for visibility standards and guidelines, and collecting of air quality data.
Wyoming State Forestry, Emergency Management Agency, State Fire Marshall's Office	Coordinates on management of prescribed fire and wildfire.
Wyoming Game and Fish Department	Coordinates and cooperates on vegetation manipulation projects, wildlife habitat management, and special status species.

Table 5-3. Key Coordination Actions (Continued)

Agency	Coordination/Responsibility
STATE AGENCIES	
Wyoming Department of Transportation	Coordinates and cooperates on transportation planning and highway access.
State Historic Preservation Office	Consults on compliance with Section 106 of the National Historic Preservation Act in accordance with the National Programmatic Agreement, as implemented in the Wyoming Protocol to that agreement.
COUNTY AGENCIES	
Fremont County Sublette County Sweetwater County	Participate in the environmental analysis and documentation process by providing information concerning environmental issues for which each specified county has jurisdiction by law or special expertise. Provide information on JMH CAP project impacts on domestic livestock grazing and social and economic impacts relating to each specified county.

5.1.2 Cooperating Agencies

The RSFO extended cooperating agency status to the State of Wyoming (including Sublette County, Fremont County, and Sweetwater County) for the JMH planning effort. The Wyoming Office of Federal Land Policy represents the State of Wyoming, with the following agencies designated as members:

1. Wyoming State Geological Survey
2. Wyoming Game & Fish Commission
3. Wyoming DEQ–Water
4. Wyoming Oil and Gas Commission
5. Wyoming State Engineer’s Office
6. Wyoming State Lands and Investments
7. Wyoming State Forestry
8. Wyoming Department of Agriculture
9. Board of County Commissioners, Sublette County
10. State Parks and Historic Sites
11. State Historic Preservation Office
12. Wyoming Business Council
13. Wyoming Livestock Board
14. Sublette County Conservation District
15. Sweetwater County Conservation District
16. Popo Agie Conservation District.

The cooperating agencies were formally invited to participate in the development of the alternatives and to provide existing data and other information relative to their disciplines. In addition to numerous conference calls, the RSFO held meetings with the cooperating agencies to discuss the overall

development of the JMH CAP and EIS. Table 5-4 provides the dates and purpose of all cooperating agency meetings held by the RSFO.

Table 5-4. Cooperating Agency Meeting Schedule

Meeting Date	Purpose
January 9, 2002	Discuss approach to the planning process and development of alternatives.
February 27–28, 2002	Discuss approach to the planning process and development of alternatives.
March 11, 2002	Work with BLM interdisciplinary team in developing alternatives.
March 18, 2002	Work with BLM interdisciplinary team in developing alternatives.
March 25, 2002	Work with BLM interdisciplinary team in developing alternatives.
April 3–4, 2002	Discuss approach to the planning process and development of alternatives.
May 2, 2002	Update the cooperating agencies on public comments concerning the alternatives and present the preliminary findings of the socioeconomic analysis and Reasonably Foreseeable Development scenario for fluid minerals.
June 26–28, 2002	Review clarifications to the alternatives, discuss assumptions used in the impacts analysis, and discuss the analysis results.
September 19–20, 2002	Present and review the Preferred Alternative.
November 8, 2002	Discuss the Preferred Alternative and present and review the Adaptive Management Implementation Strategy.
February 10, 2003	Discuss upcoming open houses and public hearings.
March 5, 2003	Discuss methods to improve the process of cooperating agency involvement. Discuss upcoming public open houses and public comments received to date.
June 25, 2003	Discuss the major issues raised by the public comments. Discuss future cooperator involvement concerning development of the final EIS.
September 10–11, 2003	Discuss and review the Proposed JMH CAP, adaptive management appendix, proposed changes concerning wilderness issues, comment response appendix, and cumulative impact analysis.
February 19, 2004	Discuss changes to the Proposed JMH CAP adaptive management strategy and provide an update on general project activities.
May 20, 2004	Final briefing prior to release of FEIS.

5.1.3 Native American Interests

As part of the general scoping process for the original draft EIS, scoping letters were sent to the Northern Arapaho, Eastern Shoshone, Shoshone-Bannock, and Ute tribes, and to the Medicine Wheel Alliance. These letters described the JMH CAP project and asked for information and input. In addition, in spring 1998, written communication was initiated with the four tribes. Letters were sent to the tribes requesting assistance in obtaining heritage resource management information for the planning area. BLM officials Bernard Weynand and Russel Tanner also met with the Medicine Wheel Alliance in June 1998. They outlined the JMH CAP planning effort to several elders at the meeting. As a result of this meeting, a tour with representatives of the Eastern Shoshone tribe was scheduled to identify the kinds of places that might be of concern to Native American peoples. A field tour was conducted with tribal representatives Haman Wise and Delphine Clair in September 1998. As a result of this tour, areas noted as “respected places” were identified. Management recommendations were identified and used in the alternative formulation process. Following the field trips, Haman Wise and Delphine Clair met with BLM staff archaeologists Russel Tanner and Terry Del Bene to discuss Native American concerns both in general and as related to several specific sites, such as rock art sites, petroglyphs, and altar and stone circle sites. Information gathered from these field trips and meetings was used in updating the BLM Heritage Resources database and in formulating management recommendations for rock art sites, the Steamboat Mountain area, Monument Ridge, Steamboat Rim, and stone circle and altar sites.

In November 1998, Tanner and Del Bene toured JMH with Eastern Shoshone elder Starr Weed and representatives Floyd Osborn and Diana Mitchell. A number of sites known to BLM were visited and general discussion occurred regarding management of sites of concern to Native American people. Mitchell commented that there should be an interpretive program that would help Native peoples appreciate the importance of their heritage.

In March 1999, letters were sent to the Eastern Shoshone, Northern Arapaho, Shoshone-Bannock, and Ute tribes asking for comments on the JMH draft EIS. No responses to these letters were received.

Since 1986, Native Americans (i.e., Haman Wise, John Tarnesse, and Delphine Clair) have been taken on tours of sites in the RSFO area that could be of concern to Native Americans relative to proposed developments. The other tribes (Northern Arapaho, Shoshone-Bannock, and Ute tribes) are known to have had a major presence in the area in historic times (i.e., 1650–1900) and have been invited to participate in all of the tours. However, they either did not respond to the invitation or indicated that the Eastern Shoshone could take the “lead.”

As part of the process for developing the supplemental draft EIS and the final EIS, a letter was sent to the Eastern Shoshone Business Council on March 26, 2002, notifying it that BLM was updating information for developing the JMH CAP. The letter also provided a history of the Native American consultation associated with the earlier JMH CAP planning efforts and requested additional information, comments, and concerns regarding all issues (not just heritage resource issues). As of July 2002, no response had been received from the Business Council.

On June 30, 2003, BLM again sent certified letters to the Eastern Shoshone, Northern Arapaho, Shoshone-Bannock, Ute, Crow, and Comanche tribal councils asking them to identify places of concern to them and requesting the names and contact information for any other persons with whom the councils would like BLM to consult concerning sacred sites or other places of concern to members of their tribes. BLM followed up on these letters with a series of telephone calls to tribal councils. No new information was provided by any of the tribal councils.

Eastern Shoshone Chairman Vernon Hill responded to BLM telephone contact by scheduling a meeting for BLM representatives to meet with the Shoshone and Arapaho Joint Business Council on August 20, 2003. Five BLM staff persons briefed the council members present at the meeting concerning the planning process, the consultation process, known places of concern to Native Americans and other issues, including wildlife habitat management. The council members asked a number of questions. Although no new information was given to BLM concerning specific places of concern, the meeting provided an excellent opportunity for BLM and tribal council members to meet and discuss these issues.

On September 27 and October 3, 2003, a BLM representative joined public tours of the Jack Morrow Hills to discuss places of concern to Native Americans. These tours mainly involved members of the Arapaho and Shoshone tribes, including several Arapaho tribal council members. The BLM representative discussed known places of concern to Native Americans, including White Mountain Petroglyphs and the Indian Gap Trail. Again, no new information was provided to BLM; however, these tours provided yet another opportunity for BLM to reach out to Native American people to strengthen ongoing consultation relationships.

On October 16, 2003, a slide show and lecture concerning sites of concern in the Jack Morrow Hills and archaeological issues in general was presented for the Eagle Staff Runners (a tribal youth group) at Wyoming Indian High School at Ethete, Wyoming. No new information was presented to BLM, but previously identified concerns were reinforced.

BLM staff archeologist Russ Tanner was invited to present a slide program to a fifth grade class at Wyoming Indian Middle School in Ethete, Wyoming (on the Wind River Reservation), on November 24, 2003. The slides and lecture concerned both sites in the Jack Morrow Hills and archaeological and anthropological issues in general. The 25 students and teachers present asked many good questions. No new information was presented to BLM. However, the students indicated a high interest in their own cultures, especially rock art sites.

5.2 PUBLIC PARTICIPATION

5.2.1 Public Meetings

5.2.1.1 Information Open Houses

Two open houses were held in Lander and Rock Springs, Wyoming, on December 11 and 13, 2001, respectively. There were approximately 115 attendees at the meeting in Lander and 85 at the meeting in Rock Springs. After publishing the supplemental draft EIS, two additional open houses were held in Rock Springs and Lander, Wyoming, on March 12 and 13, 2003, respectively. There were approximately 30 attendees at the meeting in Rock Springs and 70 at the meeting in Lander.

The format of the open houses was informal, with stations organized around the room according to the resource areas and issues identified during the workshops and the scoping conducted previously by BLM. The stations displayed various geographic information system (GIS) inventory maps for the different resources and included the general location and relief maps of the JMH CAP planning area, cultural resources, minerals, geological resources, wildlife and vegetation resources, special management areas, recreation areas, and the planning process. Attendees viewed the stations and had one-on-one conversations with BLM and Booz Allen Hamilton staff about their questions and concerns. All attendees were encouraged to provide written comments.

5.2.1.2 Scoping

A public scoping notice was prepared and mailed to federal, state, and local agencies; interest groups; and members of the general public on December 18, 2001. The mailing lists were compiled from the lists for the initial scoping process and original draft EIS, and included a total of 645 entities. The notice invited the public to participate in the scoping process and to comment on the planning criteria.

Public scoping meetings were held in Lander and Rock Springs, Wyoming, on January 8 and 9, 2002, respectively. There were approximately 84 attendees at the meeting in Lander and 77 at the meeting in Rock Springs. The format for the scoping meetings was similar to that of the information open houses, except that handouts were available at each of the stations summarizing the comments and issues concerning the specific resource as heard from the public, and a list of questions was posed on the management of the resources. A PowerPoint® presentation was also given at two different times during the meeting by the Assistant Field Manager of the RSFO. The presentation explained the purpose of public scoping and the background of the JHM CAP planning process.

A total of 325 comment letters were received and entered into a database. There were 1,356 issues/comments identified from the 325 comment letters. The top issue categories were minerals, grazing, and wildlife. A summary of these comments was then compiled as the "Jack Morrow Hills Coordinated Activity Plan Final Scoping Report, January 2002," which can be viewed at: www.wy.blm.gov/rsfo.

5.2.1.3 Preliminary Draft Alternative Meetings

The RSFO hosted two public meetings to present the preliminary draft alternatives and to request the public's review and comment. The public meetings were held in Rock Springs and Lander, Wyoming, on April 9 and 10, 2002, respectively. There were approximately 83 attendees at the meeting in Rock Springs and 92 at the meeting in Lander. The format for the preliminary draft alternative meetings was similar to that of the information open houses and scoping meetings, except that handouts were available on each of the preliminary alternatives. A PowerPoint presentation was given by Booz Allen Hamilton overviewing the development of preliminary alternatives, followed by a question and answer session. A third-party facilitator was used to promote the involvement of all interested parties.

5.2.2 Public Hearings

Two public hearings were held in Rock Springs and Lander, Wyoming, on April 9 and 10, 2003, respectively. There were approximately 102 attendees at the hearing in Rock Springs, with 56 providing official testimony. Of the 138 attendees at the Lander hearing, 65 provided official testimony.

The public hearings were conducted to provide the public an opportunity to comment on the JMH CAP and EIS. Attendees registered at the door of the hearing facility and indicated whether they would be providing official testimony. It was explained to the attendees that the purpose of the hearing was to provide an opportunity to receive comments on the JMH CAP and EIS, and that it was not a question and answer session. All attendees who provided testimony were asked to proceed to the microphone and provide their full name, affiliation (if any), and comments. Because of the number of attendees wishing to provide testimony, time limits of 5 and 3 minutes were set for Rock Springs and Lander, respectively. All oral comments submitted at the hearings were recorded and included in the official transcript for the hearings.

5.2.3 Public Comments

A total of 69,471 public comments were received via written, e-mail, Web-based, and oral communication (public hearings) from members of the public, governments, governmental agencies, and nongovernmental agencies. Comments received at public hearings were considered written comments based on the official public transcript taken. All comments were reviewed and evaluated for response as outlined in BLM Manual H-1790-1. Detailed responses to substantive comments are provided in Appendix 19. All comment letters that contain substantive information are included in their entirety in Appendix 19A (presented on enclosed CD).

The number of comments received via each media source is as follows:

- 60,288 e-mail comments
- 53 Web-based comments
- 9,130 written comments.

The large majority (>99 percent) of e-mail comments are "form letter" type comments. Of the 60,288 e-mail comments received, 60,020 are form letter comments. The primary resource values and uses discussed in the e-mail comments include minerals management, wildlife habitat, recreation, livestock grazing, wilderness values, travel and access management, and Native American values. The Web-based comments discuss various issues and topics, including existing gold claims, livestock grazing, new road construction, off-highway vehicle (OHV) use, travel and access, vegetation reclamation, and Native American values. The written comments also included 8,638 "form letter" type comments received in postcard format. The written comments include discussion of all resource values and uses.

5.2.4 Mailing List

The mailing list for public scoping was compiled from the lists for the initial scoping process and original draft EIS, and included a total of 645 entities. The mailing list has been continually updated since the initial scoping period for the original draft EIS and will be a basis for the distribution of the final EIS (see Section 5.3).

5.2.5 Newsletters

The February 2002 JMH CAP Update provided basic background information on the JMH CAP project, a scoping summary, an outline of the JMH CAP process, an update on JMH CAP alternatives development, and a general location map of the JMH CAP planning area.

The April 2002 JMH CAP Update notified those on the mailing list of the preliminary draft alternative meetings on April 9 and 10, 2002, in Rock Springs and Lander, Wyoming. The newsletter also requested comments from the public on the preliminary draft alternatives and notified the public of the dates of the 30-day public comment period.

The November 2002 JMH CAP Update provided information on the visit to the JMH CAP planning area by BLM Director Kathleen Clarke and updated the public on where BLM was in the planning process. The newsletter also notified the public that the supplemental draft EIS would be available in CD format or hard copy, and that requests for copies should be sent to the RSFO.

The November 2003 JMH CAP Update included a message from the new Rock Springs Field Manager and updated the public on changes they will see between the supplemental draft EIS and the final EIS and where the BLM was in the planning process. The newsletter also notified the public that the final EIS would be available in CD format or hard copy, and that requests for copies should be sent to the RSFO.

5.2.6 Web Site

The BLM Wyoming Web site has a link to the JMH CAP. The public can view current JMH CAP information and obtain documents, contacts, and other relevant project information. The Web site address is www.wy.blm.gov/rsfo.

5.4 LIST OF PREPARERS

Table 5-5. List of Preparers

Name	Job/Project Title	JMH CAP Responsibility
BLM Rock Springs Field Office		
Michael R. Holbert	Field Manager	Review
Stan McKee	Field Manager	Review
Ted Murphy	Assistant Field Manager	Review
Bernie Weynand	Assistant Field Manager	Review
Hank Castillon	Assistant Field Manager	Support Services
Rey Adame	Public Affairs Officer	Public Affairs
Sherry Blackburn	Geologist	Solid and Locatable Minerals, Geologic Hazards, Groundwater
Lance Brady	GIS Specialist	GIS Data
Fred Crockett	Geologist	Fluid Minerals
Renée Dana	Resource Advisor	Project Coordination
Susan Davis	Petroleum Engineer	Fluid Minerals
Teri Deakins	Environmental Protection Specialist	NEPA Compliance
Shelly Devoss	Physical Scientist	Surface Disturbance, Reclamation, Hazardous Materials
Dennis Doncaster	Hydrologist	Watershed, Surface Water
Bob Fischer	Engineer	Engineering Support, Transportation
Jo Foster	Outdoor Recreation Planner	Recreation, Visual Resources, Off-Highway Vehicle Use, Wilderness, Transportation
Jim Glennon	Botanist	Vegetation, Woodlands, Sensitive Plants
Patricia Hamilton	Realty Specialist	Lands, Access, Realty
John Henderson	Fisheries Biologist	Riparian, Wetlands, Fisheries
Lorraine Keith	Wildlife Biologist	Wildlife, Threatened and Endangered Species
John MacDonald	Natural Resource Specialist	Soils
Lance Porter	Rangeland Management Specialist	Rangelands
Jim Procarione	Mining Engineer	Adaptive Management

Table 5-5. List of Preparers (Continued)

Name	Job/Project Title	JMH CAP Responsibility
Angelina Pryich	Writer/Editor	Editing
George Schoenfeld	Environmental Scientist	Surface Disturbance, Reclamation, Hazardous Materials
Thor Stephenson	Rangeland Management/Wild Horse Specialist	Wild Horses, Fire
Dean Stilwell	Geologist	Fluid Minerals
Russ Tanner	Archaeologist	Heritage Resources
David Valenzuela	Geologist	Assistant Team Leader, Solid and Locatable Minerals, Geologic Hazards, Groundwater
BLM Wyoming State Office		
Roy Allen	Economist	Socioeconomics
Susan Caplan	Physical Scientist	Air Quality
Janet Kurman	Environmental Protection Specialist	Environmental Coordination
Dale Hanson	Paleontologist	Paleontology
Roger Lawrence	Visual Information Specialist	Illustrations/Cover
Sheri Morris	Printing Specialist	Typesetting, Printing
Larry Neasloney	GIS Specialist	GIS Technical Assistance, Mapping
Joe Patti	Natural Resource Specialist; Field Planning Coordinator	WSO Planning and NEPA Technical/Policy Guidance, Coordination among Field and WSO Staffs
Cathy Simmons	Printing Technician	Typesetting, Printing
Andy Tenney	Outdoor Recreation Planner	Recreation, Visual Resources, Off-Highway Vehicle Use, Wilderness, Transportation
Booz Allen Hamilton		
David Baxter	Project Manager	Project Management
Dean Bibles	Senior Advisor, Public Lands	Quality Assurance/Quality Control
Tonia Bleecher	Deputy Program Manager, Public Lands	Quality Assurance/Quality Control
Michael Ghazizadeh	Geologist	Mineral Resources
Joel Hanson	GIS Specialist	GIS Data, Mapping
