

**APPENDIX C**  
**Site Photographs of Bore Holes**  
**SC-01, SC-02, SC-03, and SC-04**

Site Photographs of Bore Hole SC-01, SC-02, SC-03, and SC-04

Representative vegetation surrounding the Stinking Creek substation (looking southeast).

Representative vegetation surrounding the Stinking Creek substation (looking northeast).

Proposed bore holes would be located just outside substation fence (inside the barbed wire fence) in the foreground of this photograph.

Bore hole SC-01 would be located on the far left side of this image, while boring SC-04 would be located to the right of the gravel access road on the right side of this image.

Boring SC-02 would be located roughly 100 feet from the substation fence in the center of this image.

SC-03 would be located on the far side of the substation fence on the left side of this image.
