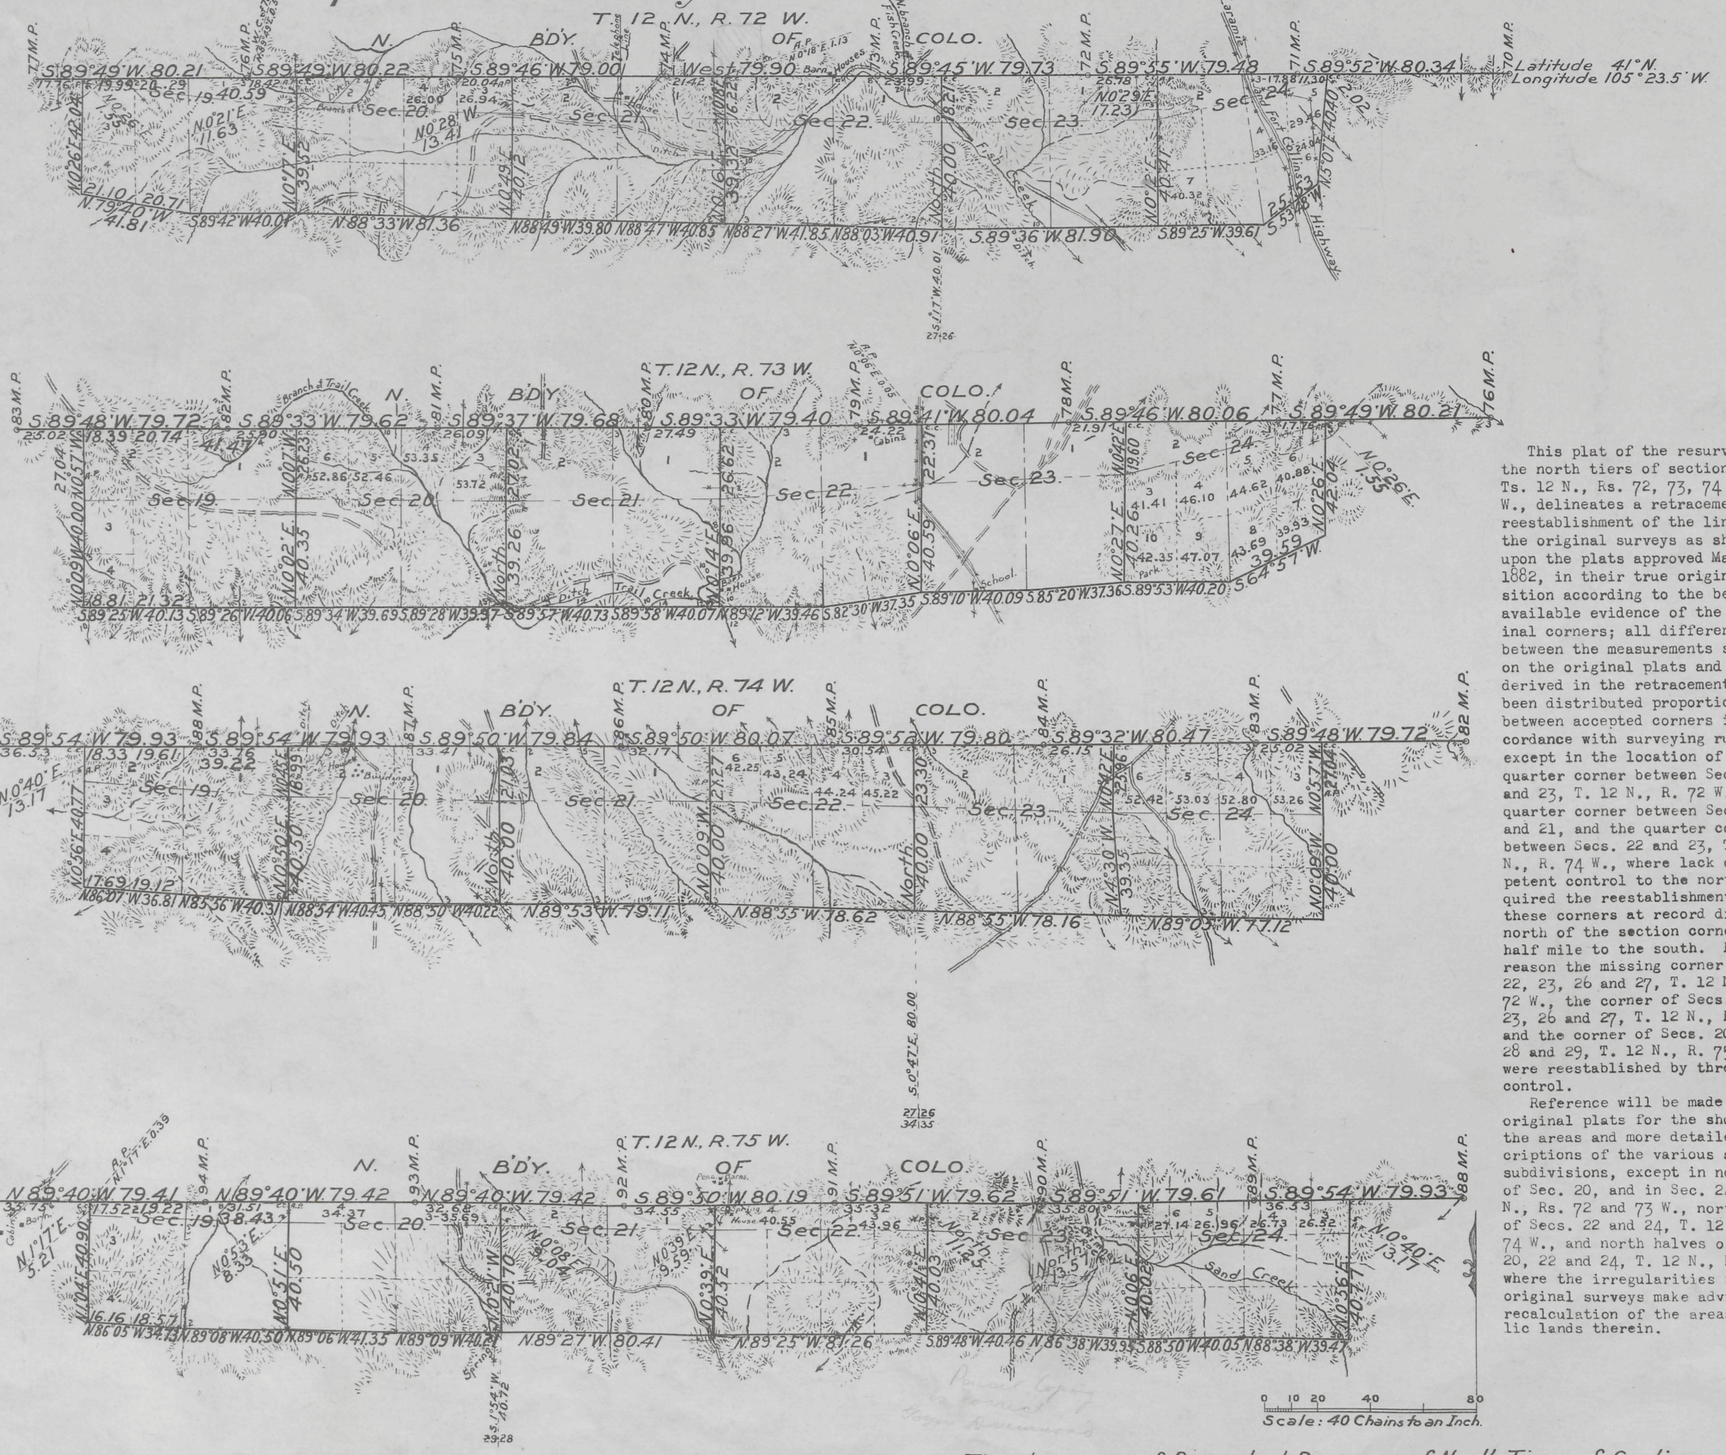
Accepted May 6, 1925.

GROUP 140.

Dependent Resurvey of North Tiers of Sections.



This plat of the resurvey of the north tiers of sections of Ts. 12 N., Rs. 72, 73, 74 and 75 W., delineates a retracement and reestablishment of the lines of the original surveys as shown upon the plats approved March 2, 1882, in their true original position according to the best available evidence of the original corners; all differences between the measurements shown on the original plats and those derived in the retracement have been distributed proportionally between accepted corners in accordance with surveying rules, except in the location of the quarter corner between Secs. 22 and 23, T. 12 N., R. 72 W., the quarter corner between Secs. 20 and 21, and the quarter corner between Secs. 22 and 23, T. 12 N., R. 74 W., where lack of competent control to the north required the reestablishment of these corners at record distance north of the section corners one half mile to the south. For like reason the missing corner of Secs. 22, 23, 26 and 27, T. 12 N., R. 72 W., the corner of Secs. 22, 23, 26 and 27, T. 12 N., R. 74 W., and the corner of Secs. 20, 21, 28 and 29, T. 12 N., R. 75 W., were reestablished by three point control.

Reference will be made to the original plats for the showing of the areas and more detailed descriptions of the various smaller subdivisions, except in north half of Sec. 20, and in Sec. 24, T. 12 N., Rs. 72 and 73 W., north halves of Secs. 22 and 24, T. 12 N., R. 74 W., and north halves of Secs. 20, 22 and 24, T. 12 N., R. 75 W., where the irregularities in the original surveys make advisable a recalculation of the areas of public lands therein.
