Latitudes and Longitudes are computed such that they portray standard sections for an elevation of 6000 ft. for this township.

The actual area of protracted blocks (PB) shown on this diagram may vary due to the reliability of the survey information used to determine the positions of the existing boundaries. A PB cannot be divided without further survey which may include establishment of monuments on reliably protracted lines.

This diagram does not constitute an official survey, but establishes the plan of survey, and may be used for leasing and administrative purposes only.

Unless otherwise shown, each unsurveyed section contains 640 acres.
