This plat represents the entire survey record of the dependent resurvey of the 45th mile of the boundary between the states of Colorado and Wyoming.

The history of official surveys pertaining to this survey is as follows: W. M. Ashley, U. S. Deputy Surveyor, surveyed the exterior of T. 12 N., R. 67 W., Sixth Prin. Mer., in 1867. E. D. Bright, U. S. Deputy Surveyor, surveyed the subdivisional lines in 1868. The south boundary of Wyoming (north boundary of Colorado) was surveyed by A. V. Richards, U. S. Astronomer and Surveyor, in 1873. Common closings to this state boundary, for both Wyoming and Colorado, were surveyed by J. M. Fowler and A. M. Fahringer, U. S. Deputy Surveyors, in 1874.

Survey executed by David L. Foster and Michael D. Boeckman, Cadastral Surveyors, beginning February 18, 1998, and completed February 18, 1998, pursuant to Special Instructions approved February 11, 1998, for Group No. 1194, Colorado.

Bearings were determined by observations of Polaris and carried forward through sustained angulation. The geographic positions in NAD 83/93, provided by Wyoming Department of Transportation.

CERTIFICATION

We, David L. Foster and Michael D. Boeckman, Cadastral Surveyors, HEREBY CERTIFY upon honor that, in pursuance to Special Instructions dated February 11, 1998 and assignment instructions dated February 11, 1998, we have retraced and surveyed that work which is represented on this plat, as having been executed by us and under our direction; and that said survey has been made in strict conformity with the Special Instructions for Group 1194, Colorado, and the Manual of Surveying Instructions, 1973.

Michael D. Boeckman — April 30, 1998
Cadastral Surveyor — Date

David L. Foster — May 7, 1998

LEGEND

- State Line
- Original Offset Tangent (Yellow)
- 1945 Trial Tangent (Red)
- Closing Corner Stones

At Mile Post locations from M.P. 31 to M.P. 43 inclusive no evidence of the original monuments was found. The figures given between the original tangent and the State Line at the Mile Posts are the recorded offsets. The figures given for distance from Trial Tangent to State Line at Mile Posts represent the difference between the actual distances, tangent to tangent, and the recorded offset from the Original Tangent. All Mile Posts from M.P. 30 to M.P. 43, inclusive were restored by setting old grader blades 3/4" x 6" x 6' three feet deep. At the top of each blade was stamped into the metal:- Colo on south side, Wyo on north side and the Mile Post number.

T. H. Baldwin
County Surveyor
Laramie County - Wyoming
