NPL comment

Dear BLM,

I think the proposal for the NPL project is a good idea. The new wells will bring in more money for the County. It would also create more jobs for people to have. The bad thing about it though is that it will affect the air quality and make it even worse than it already is. Another bad thing is that it will also mess with the wildlife even more than it already has. The land will also be a little messed up but they could restore it by planting stuff back there when they are done so that way it will kind of look like it was before. Even with all those things I still think it is a good idea to put all those wells out there and keep drilling.

Sincerely,

Jesse Bishop
