NPL Project

(See attached file: NPL.docx)

Alejandro Bermudez 5/6/2011

I am writing in regards to the NPL project proposed by EnCana, and I like this project that EnCana had proposed to Sublette County, because this project is going to create new jobs opportunities and maintain local jobs, and this project it will be good for the state of Wyoming. But I have a few concerns about this project; I am worried about the air quality and water quality, because I don't want this project to create more pollution in our area.

And I have a few questions to ask about the air quality and the water quality.

The first question is What EnCana is going to do about the air quality? , and I want to know if EnCana is going to work with some organizations that care and protect the environment? Because this last winter we had a bad air quality.

The second question is about the water quality, I want to know what EnCana is going to do with the dirty water used for wells, are they going to recycle that Water? , And how are they going to transport the water that the wells needs are they going to use pipe lines?

Sincerely

Alejandro Bermudez
