Pinedale, WY 82941

Dear Kellie:

This letter is to state my support of the NPL Project located in southern Sublette County.

Over the past several years our firm has had the opportunity to work in the Jonah Field. I have been impressed with the past commitment in this area to protecting the public lands, the environment and our wildlife.

This field has created significant employment in Sublette and Sweetwater Counties and contributes significant tax revenue for federal, state and local government. Responsible development of the NPL Project will allow stable employment to continue for a considerable period into the future.

I feel the most important factor to be considered is that the existing field is one of the largest natural gas producers in the state. We need to encourage energy companies to produce more domestic natural gas, especially when they have proven in the past that this can be accomplished with minimal impact to wildlife and the environment.

The bottom line is that this project is good for Wyoming and good for the country as a whole. They produce much needed natural gas for the nation. They provide jobs for Wyoming citizens and tax revenues for federal, state and local government. They have a proven record of commitment to our wildlife and our environment.

I am in support of this project and look forward to seeing the final document.

Sincerely,

A handwritten signature in blue ink that reads 'Craig Shauers'.
