 Comment letter on NPL EIS WY

Thursday, May 12, 2011

Hi Kellie,  
 Attached please find my comment letter regarding the NPL.  
 Thanks for sending a confirmation e-mail that you received this e-mail and attachment as the  
 deadline is today.  
 I will also put a hardcopy in the mail.  
 Best,  
 Dari

RE: Comment on Normally Pressured Lance (NPL) EIS

Dear Kellie,

Thank you for the opportunity to comment on the Normally Pressured Lance (NPL) Natural Gas Development Project in Sublette County, Wyoming proposed by Encana Oil & Gas (USA). I am in support of the proposed development for a number of reasons. I believe that the project will have a significant economic benefit for the region. I believe that the project will help to further develop domestic energy. I believe that if the project is not allowed to move forward at this time, Encana and other energy companies may decide to pursue development out of Sublette County and even out of the state which will negatively impact our regional economy. And, once these companies have left Sublette County, they may choose to never come back to the area.

With that said, I also believe that industry must do its part to follow all rules, regulations, and best practices as gas and oil reserves are developed in Sublette County. Furthermore, I do believe that industry should provide mitigation funds not only for impacts on wildlife and other natural resources, but for socio-economic impacts as well. These types of impacts include increased demand on community services, particularly healthcare.

Again, thank you for the opportunity to comment.

Sincerely,

Dari Quirk
